

A collaborative research environment

In Scotland, a range of initiatives bring together the NHS, academic researchers and industry partners, positioning Scotland as a world leader in health research and supporting innovation across health and social care.

"Scotland is a world leading location for clinical research as evidenced by its well connected life sciences sector, strong research base, talent pool and streamlined, joined up approach to supporting companies."

Julia Brown, Senior Director,
Healthcare Life and Chemical Sciences, Scottish Enterprise

Innovation Centres

Stratified Medicine Scotland

Links Scotland's expertise, data assets and delivery infrastructure to accelerate the real world adoption of Precision Medicine.

Centres of Excellence

Specialist centres of excellence across Scotland drive collaborative research in targeted disease areas. With substantial support from partners these centres provide state of the art research facilities and aim to improve the lives of patients through fundamental discovery research and portfolios of patient-centred research projects. Some of these Centres include:

Asthma UK Centre for Applied Research | BHF Cardiovascular Research Centre | Centre for Dementia Prevention | Centre for Arthritis and Musculoskeletal Health CRUK Beatson Institute | Drug Discovery Unit | GLAZgo Discovery Centre | Imaging Centre of Excellence (ICE) | MRC Centre for Regenerative Medicine | Paul O'Gorman Leukaemia Research Centre | The Anne Rowling Regenerative Neurology Clinic | The Euan MacDonald Centre for Motor Neurone Disease Research | The Wolfson Wohl Translational Research Centre
