

Primary Care Research Network Clinical Lead Job Description

Background

NHS Research Scotland (NRS) is a partnership involving Scottish NHS Boards and the Chief Scientist Office (CSO) of the Scottish Government. The overarching aim of NRS is to ensure that NHS Scotland provides the best environment to support clinical research. This is achieved through the application of best practice and processes that can support efficient working, as well as providing the solid infrastructure that is needed to support all research undertaken in the NHS for patient benefit. CSO provides NRS funding to the NHS to support this aim. More generally, NRS contributes towards a thriving life sciences sector in Scotland, which is in turn critical to the ability of the NHS to deliver world-class health outcomes.

Key elements of the NRS Infrastructure are the Topic Specific Research Networks. These act as the interface between the research community, the NHS and patients themselves, facilitating the development, set up and completion of clinical research studies across Scotland, improving the quantity and quality of research within their specific clinical area.

The NRS Primary Care Network is funded by the Chief Scientist Office to facilitate high quality, funded, research studies, both academic and commercial, which are relevant to primary care. The network facilitates the timely, appropriate and effective recruitment and follow-up of patients in primary care settings and covers the entire range of clinical research areas.

The NRS Primary Care Network works with a wide range of primary care health professionals and promotes research in areas for which primary care has a particular responsibility.

The current post will form part of a group of senior personnel with a crucial remit to provide strategic leadership on the delivery and development of clinical research within their clinical areas for NHS Scotland.

Role outline

Accountability: The post is accountable to CSO

Hours: 0.2FTE/ 2 PAs per week

Length : 3 years initially, with possibility to extend

Salary: Pro-rata within the post holder's pay scale

Role and remit

- Provide national leadership in the development of clinical research activity within Primary Care in Scotland.
- Increase the number of clinical studies, and the number of patients recruited into them, both in Primary Care and in other topics delivered through Primary Care.
- Work with established groups, individual clinicians, NRS Research & Development Directors and lay representatives, to promote Primary Care research, development and innovation (R, D&I)
- Facilitate the development and delivery of high quality clinical research projects, encouraging clinicians to participate in clinical research.
- Provide clinical perspectives for the delivery of the studies lying within the Primary Care research portfolio.
- Contribute to the development of infrastructure, national strategies and initiatives across Primary Care clinical research and NRS.

Key Duties and Responsibilities

- Ensure that the continued development of the Primary Care research portfolio maximises patient focussed research opportunities for patients across all sectors of the Scottish population.
- Responsible for leading the development, implementation and on-going review of the NRS Primary Care Research Network strategy.
- Promote the NRS Primary Care Research Network to both commercial and on-commercial research funders.
- Proactively promote local clinical engagement and awareness of Primary Care research , providing advice, support, encouragement and mentorship to clinicians who express an interest in becoming involved in a research project.
- Ensure the timely and effective delivery of all the studies within the Scottish Primary Care portfolio.
- Provide a strategic overview of the infrastructure required to support Primary Care research in Scotland
- Management of senior network staff in collaboration with local NHS / University employers.
- Facilitate and encourage the development of a network of local contacts within the Primary Care research community.
- Plans, monitors and reports on NRS Primary Care Research Network expenditure in conjunction with the R&D offices of host Boards to the Chief Scientist Office.

Skills, Knowledge and Experience Required

- The post holder will play a key leadership role in the on-going development and performance of the Network.
- The post holder will be an established clinician resident and working in Scotland, and must be able to demonstrate a proven track record in clinical research activity within Primary Care.
- A motivational leader with well-developed interpersonal skills and the ability to work with stakeholders at all levels.
- Excellent communication and presentational skills with the enthusiasm to act as an opinion leader
- Experience in managing people and budgets would be desirable.
- Strongly committed to bringing benefits to patients through the delivery of excellent patient focussed clinical research within the NHS.
- Active involvement in studies supported by the Network or other equivalent bodies would be desirable
