

The Scottish Oral Health Research Collaboration (SOHRC) – Harnessing Oral Health Research Experience

LMD Macpherson, PA Mossey, JE Clarkson, A Walls, E Gupta, DH Felix, J Bagg, MP Hector, A Ayoub, RJ Ibbetson, D Kelliher

The Scottish Oral Health Research Collaboration has brought together researchers from throughout Scotland to deliver high quality oral health research that supports the needs of the Scottish population

Through its collaborative research activities, SOHRC is working to:

- Raise the quality and profile of Scottish oral health research
- Build on existing strengths
- Widen existing research networks
- Encourage clinicians to participate in research
- Ensure oral health research is focused on the needs of Scotland

Examples of grant funding

‘HPV oral prevalence in Scotland (Hopscotch) Feasibility Study’. Chief Scientist Office. £205,415.

‘Improving Systems of Care for the Older Person (I-Scope)’. Dunhill Medical Trust. £132,796.
