Mind the Gap

**ALEXANDRA MCCAULEY**  
Falling through the  
Gaps

**DR MARTHA  
POLLARD**  
Carers and the Pandemic

**DR MARIYANA  
SCHULTZ**  
Psychological First Aid

**DR MICHELLE BEATTIE**  
Extension for Community  
Healthcare Outcomes Research

**LEAH FULLEGAR**  
Continence and Care  
Work

## Workshops

**DR STEPHEN  
SMITH**  
The Listening Chair

**DR GERALDINE  
FINNAN**

**DR LIZ  
FORBAT**  
Palliative and End of  
Life Care Research

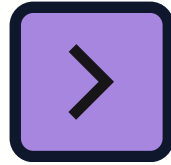

**GENERATIONS  
WORKING TOGETHER**

**DR  
ROSIE ASHWORTH**  
Patient & Public  
Involvement

## CURRENT STUDIES

### **Artificial Intelligence and Multimorbidity: Clustering in Individuals, Space and Clinical Context (AIM-CISC)**

The study aims to understand professional, patient and carer experience of health and social care for people with multiple long-term conditions and to identify better ways of organising care. The team are looking for care home managers and senior staff (senior carers and nurses) for online (via Teams) individual interviews lasting between 40-60 minutes to help co-design future interventions. You will be offered a £25 gift card as a thank you for your time.

Contact Dr Stella Arakelyan for more information, [stella.arakelyan@ed.ac.uk](mailto:stella.arakelyan@ed.ac.uk)

### **The aim of the study is to find out the experiences of staff supporting student nurses in practice when they are on placement in a social care or non-NHS clinical setting.**

The aim of the study is to find out the experiences of staff supporting student nurses in practice when they are on placement in a social care or non-NHS clinical setting. The study is open to staff who have a role as either a practice supervisor or practice assessor for student nurses in a social care or non-NHS clinical setting in Scotland. Participants are invited to complete an online questionnaire.

### **QUEST – The acceptability of using technologies in the home to monitor health and wellbeing, a qualitative study**

The QUEST project is developing non-invasive, remote, contactless techniques to monitor health in the home or community settings. Researchers at the University of Glasgow are holding focus groups and interviews with members of the public and professionals to share their views about new technologies to remotely monitor health in the home.

### **The DACHA Study**

Funded by the National Institute for Health and Care Research (NIHR) and sponsored by the University of Hertfordshire, researchers are looking for participants to take part in a consultation. Individuals who have a relationship with older people's care homes in the UK, in their capacity as a care home staff member or manager, care home resident, primary care professional, commissioner/service provider, old age specialist (clinical/ research), or a relative/family carer of a care home resident, are invited to participate in this 25-minute online survey. The survey closes on 5th March.

## CURRENT STUDIES

### Exploring advance care planning education delivered by hospice specialists to care home staff in post pandemic conditions

This survey is exploring advance care planning education delivered by hospice specialists to care home staff in post pandemic conditions. The data gathered from the anonymous survey will be used to inform future advance care planning education and practice.

### Digital Nutritional Assessment Tool

The team are looking for:

- Care staff to take part in a short survey about features of the tool based on previous feedback from care home staff. It is anonymous and you can leave your email to be entered into a draw to win a £50 amazon voucher.
- Three care home managers to take part in a short interview on how the app can be integrated into their care home. Each manager will receive £30 for taking part.
- Care staff to take 30 different photos. This can all just be taken on your mobile phone above the plate/cup. They will receive £50 for submitting the photos.

### **SEARCH-U**

Researchers from the University of Leeds are investigating the research priorities of care home staff, residents and relatives. We are helping the team of researchers to deliver this study in care homes across Scotland. We are available until mid-April to come to a care home to deliver the surveys and have structured conversations with residents. Please get in touch with your local ENRICH CSO or [Tay.ndntayside@nhs.scot](mailto:Tay.ndntayside@nhs.scot) to arrange this.

**Longing for: Designing communication tools that enable care home residents and staff to explore, address, and express intimacy through participatory design interventions**
